Management report

Chapter 1

Meetings description

1.1   Meeting 1: 21/11/2022

First group meeting for the domain analysis diagram. We did a brainstorming to find the different classes with the different links/connections from a diagram that Lucas made. Everyone participated, proposing changes to better define the diagram.

1.2   Meeting 2: 23/11/2022

Following the teacher's remarks, we made changes with object-oriented thinking. We all worked on the connections together to complete the diagram.

Chapter 2

Personal impressions

Supervising this step was really easy because the people in the group are serious, they do the required/necessary work by themselves.

In my opinion, the time planned for the deposit was maybe a bit short or there was a missing session with the teacher at the beginning of the week.

Maybe a word about the fact that I am supposed to supervise the whole team in general. Not everybody works that hard in the team for each step, but I understand (there is motivation for the project, tastes as some prefer design, others development). Still, everybody participates anyway, so I would say that for the moment everything is going well.
